ReSPR Technologies

Pasaje Rio Ulla, 5 - Malaga, 29196 - Spain.
info@resprtech.com

It is to certify that the below-mentioned product has been thoroughly checked by our organization against the standards set in our updated manuals and catalogs. All the raw materials used in its production were free from any toxic or environmentally harmful chemicals. The direct processes involved in the production and indirect processes of the overall business practices have been tested, checked, verified and approved by our Quality Assurance Department and Compliance Department.

The product met the quality standards and the required specifications. This included the raw materials, involved processes, and performance of the product. The packaging of the product also met the quality standards and is recyclable and environment friendly.

No animal testing was involved in the development of the product. No child labor is employed. Safety conditions and precautions in the production facility are satisfactory. The product meets the ethical standards set by us.

No breach of law, rules or regulations has been found. The organizational practices, raw materials, product, processes, and packaging have been verified and approved.
